Health risks are reduced, endurance and energy are multiplied and most importantly for some Paleo diet followers, weight is controlled and reduced to your desired levels. So what is the Paleo Diet all about? The Paleo diet is one of the few diets that is slowly but surely gaining worldwide acceptance. Its success can be credited to its unique take on the proper diet that is best for consumption. The basic foundation of the diet is found on the Paleolithic era or most commonly known as the Stone Age. The idea behind the diet is that our human ancestors, the cavemen, are one of the most physically fit humans to have ever walked the face of the earth. The secret behind the cavemen's ability is their source of nutrients and energy. During those ancient times, the caveman diet consisted primarily of all natural foods. The food was neither processed nor refined. The contents of the diet were also low on sugar and dairy. The major food groups, which were also the only ones available at that time, were those that were naturally growing in the environment of the caveman. These were simple meats, vegetables, fruits, nuts and seeds. The Paleo diet focuses on weight loss and muscle tone through healthy eating and full-sized portions. NO MORE calorie counting, starvation, or unhealthy changes to your diet! Your target weight is well within your reach as the information and detailed guidance contained in this book will bring you closer to making your health dreams come true! See you on the inside! *Don't forget to claim your FREE BONUS at the end of the book!
