The Safe And Effective Use Of Pesticides (Pesticide Application Compendium 1)

Synopsis

University of California Statewide integrated Pest Management Program (UCIPM) Agriculture and Natural Resources (ANR) Publication 3324: The Safe and Effective Use of Pesticides: Pesticide Application Compendium 1 Volume 1 in the Pesticide Application Compendium. This revised edition contains a new format, up-to-date information on the Federal Worker Protection Standards, recommended steps in training workers, and compliance guidelines for pesticide use reporting as required by California law. New in this version are review questions at the end of each chapter similar to those found on the license exams. As with the first edition, The Safe and Effective Use of Pesticides provides detailed information for selecting, using, handling, storing, and disposing of pesticides. It emphasizes worker protection, prevention of groundwater contamination, protection of endangered species and wildlife, and reduction of environmental problems. The principles described in this volume apply to all areas of pest control, including agricultural, structural, landscape, greenhouse, and public health applications

This is the book needed to prepare for the CA Department of Pesticide Regulation's QAL/QAC exams. However, it is available new from the University of California's ANR Catalog for \$35! I cannot believe what people are trying to sell this book for on . Always check for books like this (including UC's IPM Handbook and UWYO's Weeds of the West) from the school or organization that publishes them. They will almost always be cheaper.

I like this book because I really get to understand and to learn more of pesticides and to have a better future this book was all I needed to learn a lot

Book has minimal writing for being in very good shape overall all pages are there and book is in tact.

Book as advertised. No issues. Good buy.

Book is new condition
